Sabahat Qadeer

Contact: +92 312 5603393

Email: sabahatqadeerbhati@gmail.com

GitHub: github.com/sabahatqadeer682

Location: Wah Cantt, Punjab, Pakistan

Objectives

A motivated and creative Web & Mobile App Developer with strong skills in the MERN stack (MongoDB, Express.js, React.js, Node.js) and cross-platform app development using React Native. Skilled in UI/UX design, API integration, and database management. Seeking opportunities to apply technical expertise and problem-solving abilities to deliver innovative digital solutions and gain hands-on industry experience.

Key Accomplishment

- Built Food Fusion, full-stack MERN restaurant web app online ordering and table reservations.
- Designed Stitch & Style, a mobile app for tailor order handling, measurements, and delivery tracking.
- Developed a Hospital Management System (Java) for patient, doctor, and staff records.
- Designed a responsive Food Website (HTML, CSS) for menu showcasing and services.
- Gained strong knowledge in Networking (basic concepts, data flow, and security).

Major Responsibilities and Achievements

Web Development Projects | Riphah International University | 2022 – 2025

- Designed and developed multiple web and mobile applications as part of academic and freelance projects, ensuring scalability and responsive UI/UX.
- Collaborated using Agile methodologies (Scrum, Git-based workflows) to deliver projects on time with high code quality.
- Built full-stack web apps with the MERN stack and cross-platform mobile apps using React Native.
- Implemented RESTful APIs, authentication systems, and database integrations (MongoDB, Firebase).
- Gained hands-on experience in the full project lifecycle, from requirements gathering to deployment.

Projects

- **Food Fusion(Restaurant Web App):** Full-stack MERN app with online ordering and table reservations.
- **Stitch & Style (Tailor Management System):** Mobile app for order management and delivery tracking.
- **Clothing Management System (C++):** Console application for stock management.
- **Hospital Management System (Java):** Application for patient, doctor, and staff record handling.
- **Food Website (HTML, CSS):** Responsive restaurant website for menu and services.

Skills

Languages & Frameworks: MERN Stack, Java, C++, React Native, HTML, CSS, JavaScript

Databases & Tools: MongoDB, Firebase, Git/GitHub

Design & Creativity: Adobe Photoshop, Adobe Illustrator, UI/UX Design, Responsive Web Design

Networking & Cloud: Basic Networking, Microsoft 365 for data collaboration

Tools & Platforms

Visual Studio Code, Android Studio, Firebase, MySQL , Mongo dB

Certification

- Coursera: Introduction to Software Engineering
- Coursera: Effective Presentation
- IELTS Writing Section – Achieved proficiency
- Adobe Photoshop Workshop – Successfully completed

Qualification

BS Software Engineering | Riphah International University **|** 2022 – Present
